# INDEX TO THE MAPS OF IRELAND,

ON THE SCALES OF

25.344 AND SIX-INCHES TO ONE MILE.

## PREFACE.

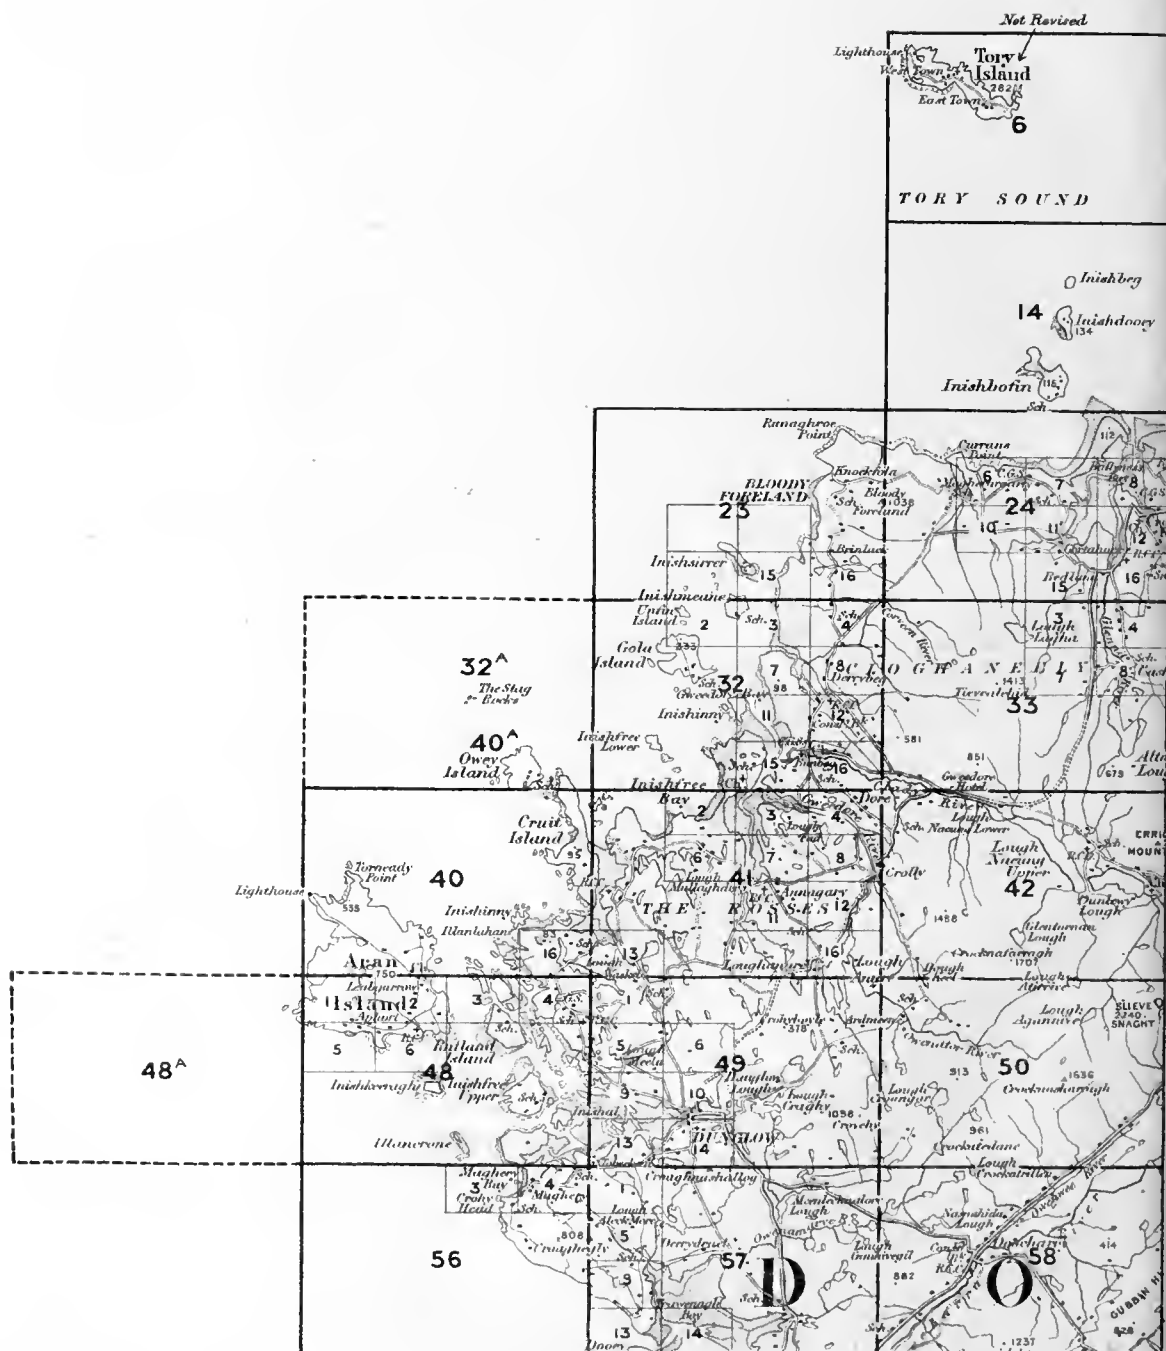

The Index is drawn on the scale of Four Miles to One Inch. All the counties are on different meridians and are arranged separately in the Index. The number of each 6-inch sheet is shown in its centre. Every  $\frac{1}{25000}$  plan has its number in the centre of it. Where there is no number, there is no  $\frac{1}{25000}$  plan of that area. Thus, in the diagram, the number of the 6-inch sheet is 25.

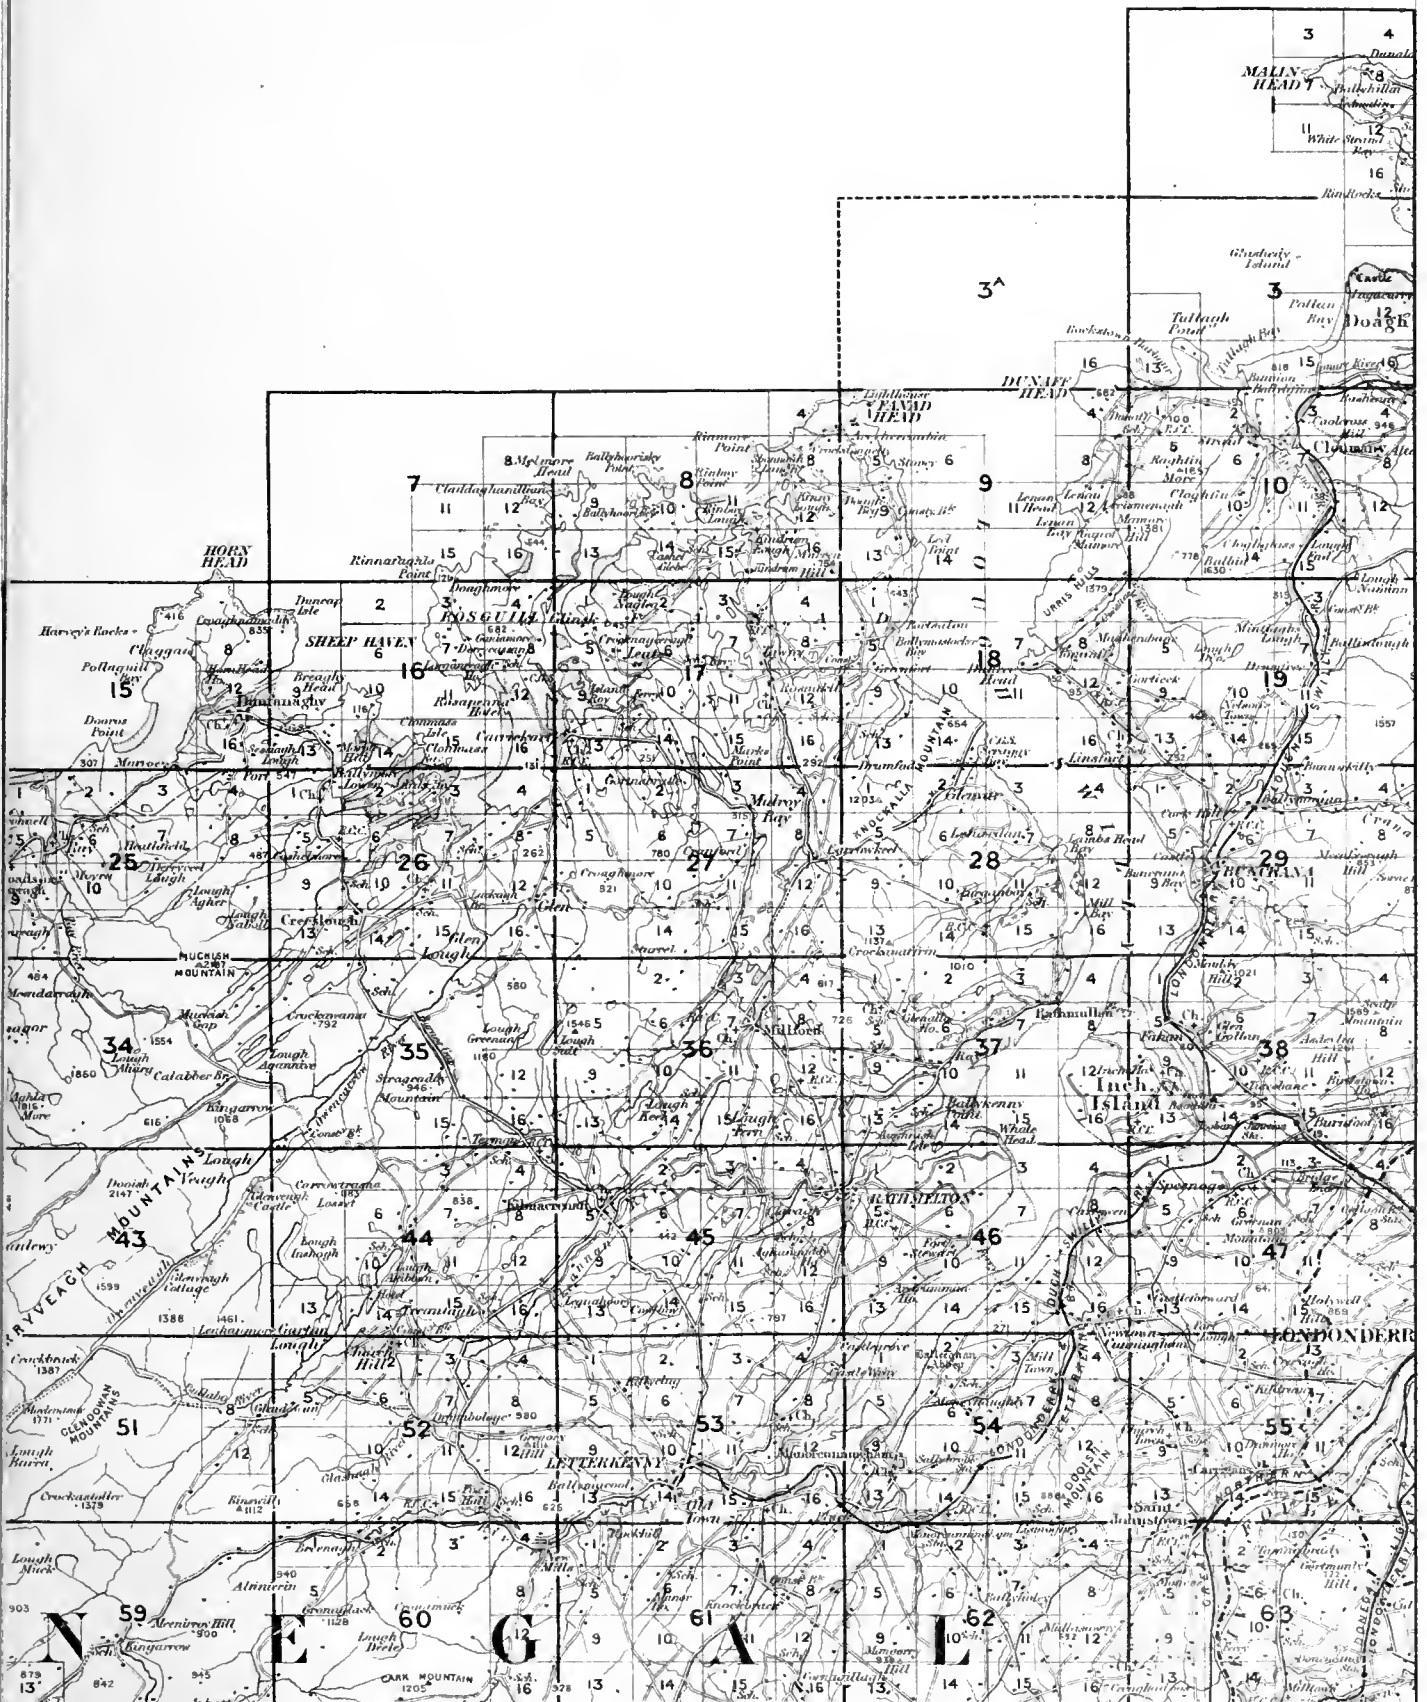

1	2	3	4
5	6	7	8
25			
9	10	11	12
13	14	15	

Also, there are the following  $\frac{1}{25000}$  plans, all forming part of 6-inch sheet 25, and described as 25. 1, 25. 2, 25 13, etc. It is known that there is no 25. 16, as there is no such plan number on the Index; i.e., this plan has not been published on the  $\frac{1}{25000}$  scale either because it is moorland or uncultivated district, or because no part of it falls within the county in question.
